

# IIoT Specialist (Industrial Internet of Things)

## THE ROLE

Develops, integrates, and manages IoT solutions for connected manufacturing environments. Ensures data collection, monitoring, and analytics from industrial sensors and equipment to support digital transformation

## THE WORK

Design IoT network architectures, configure sensors and gateways, and ensure data flow security. Monitor system performance, troubleshoot connectivity issues, and support predictive maintenance and process optimisation.

## THE COMPETENCES

Knowledge of IIoT protocols (MQTT, OPC UA), data integration, and automation networks. Skills in analytics, troubleshooting, and cybersecurity for industrial systems. Collaboration, problem-solving, and continuous learning mindset.
