

Cloud and Edge Computing Expert

THE ROLE

Designs and manages distributed computing architectures connecting vehicles, production systems, and cloud infrastructures. Optimises performance, scalability, and data processing between edge nodes and central systems.

THE WORK

Develop and deploy hybrid cloud/edge frameworks. Secure and maintain communication between devices and platforms. Implement monitoring and recovery processes to ensure data reliability and low latency.

THE COMPETENCES

Knowledge of virtualisation, containerisation, and edge orchestration. Skills in cloud platforms (AWS, Azure, or similar), cybersecurity, and network optimisation. Systems thinking, troubleshooting, and performance tuning abilities.
