

Energy Transition Expert

THE ROLE

Leads the adoption of sustainable energy solutions within automotive operations and supply chains. Focuses on integrating renewable energy, electrification, and decarbonisation strategies aligned with corporate sustainability goals.

THE WORK

Assess energy efficiency and carbon reduction opportunities. Plan and implement renewable energy projects and alternative propulsion strategies. Monitor performance metrics and ensure compliance with energy transition policies and targets.

THE COMPETENCES

Expertise in renewable energy systems, carbon accounting, and sustainable manufacturing. Analytical and strategic planning skills. Knowledge of energy policies, data analysis tools, and communication with multidisciplinary teams.
