

Sustainability Analyst

THE ROLE

Monitors and evaluates sustainability performance across operations, products, and suppliers. Supports ESG strategy implementation and ensures alignment with corporate responsibility and EU sustainability regulations.

THE WORK

Collect and analyse sustainability data, prepare ESG reports, and assess compliance with environmental standards. Advise departments on sustainability integration and support external audits and disclosures.

THE COMPETENCES

Understanding of ESG frameworks, reporting tools, and environmental metrics. Analytical, organisational, and communication skills. Competence in data visualisation and collaboration with sustainability stakeholders.
