

Automotive Maintenance Specialist

THE ROLE

Performs advanced maintenance, diagnostics, and repairs on vehicles and automotive systems. Ensures compliance with manufacturer standards and contributes to improved service quality and vehicle reliability.

THE WORK

Inspect vehicle systems (mechanical, electrical, hybrid), perform diagnostics, and carry out repairs or replacements. Maintain workshop documentation and ensure quality control. Apply sustainability principles in waste management and part recycling.

THE COMPETENCES

Knowledge of vehicle systems, diagnostics, and maintenance procedures. Skills in using diagnostic tools, interpreting service data, and applying safe work practices. Customer focus, attention to detail, and continuous learning.
