

AI-Powered Procurement Analyst

THE ROLE

Applies artificial intelligence and data science techniques to improve procurement efficiency and predict supply chain disruptions. Focuses on automation, optimisation, and predictive analytics.

THE WORK

Develop AI models to assess supplier risks and performance. Integrate analytics dashboards with ERP systems. Support category management, cost tracking, and sustainability monitoring through automated insights.

THE COMPETENCES

Knowledge of AI algorithms, data visualisation, and procurement analytics. Skills in Python, Power BI, or similar tools. Ability to interpret complex data, collaborate across departments, and recommend data-driven improvements.
