

Strategic Sourcing Specialist with AI

THE ROLE

Combines procurement strategy with AI-driven analytics to optimise sourcing and supplier selection. Enhances decision-making through data-based insights and predictive analysis of market and supplier trends.

THE WORK

Use AI tools to evaluate supplier performance, monitor sustainability compliance, and forecast risks. Negotiate strategic contracts, implement cost-optimisation initiatives, and collaborate with cross-functional teams on innovation sourcing.

THE COMPETENCES

Expertise in data analytics, procurement strategy, and AI applications. Skills in supplier relationship management and sustainability evaluation. Analytical mindset, digital literacy, and ability to turn insights into strategic actions.
