

ISO 560xx Automotive Innovation Agent and Assessor

THE ROLE

Supports organisations in implementing and assessing innovation management systems in line with the ISO 560xx standards. Ensures that innovation processes—from idea generation to strategic intelligence and partnerships—are structured, data-driven, and continuously improved. Applies AI and big data methods to manage foresight, identify innovation opportunities, and enhance decision-making.

THE WORK

Interpret and implement ISO 560xx standards across R&D, management, and production. Lead innovation capability assessments based on ISO 56004 and ISO 33020 frameworks. Establish and evaluate strategic intelligence and partnership models, ensuring alignment with corporate goals. Support audits, benchmarking, and improvement plans using innovation analytics and performance indicators. Promote innovation culture and knowledge-sharing across departments.

THE COMPETENCES

Expertise in innovation management systems (ISO 56001/56002) and assessment processes (ISO 56004). Knowledge of AI, big data, and strategic intelligence for innovation foresight. Ability to manage partnerships, intellectual property, and resource planning. Strong analytical and communication skills to evaluate innovation maturity, guide improvement, and align stakeholders across the automotive ecosystem.
