

Education Program Designer

THE ROLE

Designs and develops educational programmes integrating green and digital skills to support the automotive sector's transformation. Translates labour market needs into training curricula and learning pathways.

THE WORK

Analyse training needs and create competence-based programmes. Develop blended and e-learning content, ensure alignment with standards, and evaluate learning outcomes. Collaborate with institutions and industry partners to ensure relevance.

THE COMPETENCES

Knowledge of curriculum design, instructional methods, and sustainability education. Skills in e-learning tools, project coordination, and stakeholder engagement. Creativity, adaptability, and communication across educational and industrial contexts.
